My Unforgettable Experience

30th January, 2019

sunny

Last week, I moved into the new flat and wanted to repair the old machine that I brought from the old flat. When I was repairing the machine, I was trapped in it. I made some loud noise and made my neighbours wake up. Two children next to my flat came and helped. They pressed the button and the window opened.

I went inside the machine because I wanted to fix it. However, I got stuck and I could not get out of it. I was puzzled because I had fixed many machines and I didn't expect that I would be stuck inside. I saw the wires sticking together so I wanted to fix them.

Suddenly, I heard some children coming into my flat and said, 'Sir, do you need any help?' I was so happy to hear that. Then, I yelled, 'Help me! Help me!' The children were clever and they could find a button that said, 'Press to open window'. Finally, the children opened the window and saved me. The children laughed at me because I looked really silly under the wire. Then, the two children helped me to get away, 'I'm free! I'm free!' I said.

At last, I said my 'first' hello and 'thank you' to them. It was my first time, so I was really shy. The children said, 'Since we are neighbours, can we be friends?' I answered them happily, 'Yes! Of course! You are my first friends!'

After that day, I knew that I should make more friends because friends are important. Friends cheer me up when I am sad. Friends share everything together too. I hope that I could make more friends soon.
